PROFESSIONAL SUMMARY

Software Developer and Technical Project Lead with hands-on experience coordinating software projects, business analysis, and ERP/HRMS applications end-to-end — from client requirements through proposal, development, testing, delivery, and support. Combines a strong technical foundation in Next.js, React, TypeScript, Node.js, PostgreSQL, Prisma, Supabase, and RBAC with practical Agile/Scrum project coordination, client communication, and QA experience.

PROFESSIONAL EXPERIENCE

Software Developer / Technical Lead | Hirush Global LLP

Nov 2025 – Present

- Lead end-to-end delivery of 10+ client software projects, from requirements gathering through development, testing, and post-delivery support, coordinating teams of 3–4 developers.
- Translate client requirements into functional workflows, modules, roles, and permissions for enterprise systems spanning ERP, HRMS, CRM, Finance, Payroll, and Attendance.
- Author project scopes, proposals, and quotations, achieving a strong client approval rate while keeping proposal turnaround to a few business days.
- Run UI/UX planning sessions and client review cycles, reducing post-approval revision rounds through earlier, clearer requirement sign-off.
- Delegate and track development tasks across the team, mentoring junior developers and improving average task turnaround.
- Own functional, regression, and UAT testing across releases, reducing post-release defect reports through earlier bug verification.
- Resolve client change requests and production issues promptly, maintaining a high on-time delivery rate.

Frontend Engineer (concurrent, part-time) | Pro26 LLP

May 2025 – Present

- Build and ship responsive features using Flutter, React, and Firebase, integrated with REST APIs powering production applications.
- Improve app load performance through debugging and optimization work alongside UI/UX enhancements.

SEO Analyst | Hirush Global LLP

Feb 2025 – Nov 2025

- Ran technical SEO audits across multiple client sites covering indexing, crawlability, Core Web Vitals, structured data, and XML sitemaps.
- Partnered with development teams to ship performance fixes that measurably improved Core Web Vitals scores.

Application Manager | Eduthalim International Educational Consultancy

3 Months

- Managed the full application-to-onboarding pipeline for prospective students, maintaining records and preparing operational reports for management.

SELECTED PROJECTS

Hirush ERP – Enterprise Resource Planning System

Next.js | React | TypeScript | Prisma | PostgreSQL | REST APIs

- Built modules covering HRMS, CRM, Finance, Payroll, Attendance, and Reporting, with role-based access control across multiple permission tiers.

Hotel & Hospitality Management System

Next.js | React | TypeScript | PostgreSQL | Supabase | REST APIs

- Delivered booking, check-in/check-out, billing, and inventory workflows in active use for hotel reservations, with role-based access for staff and admins.

Enterprise HR & Management System

React | TypeScript | Firebase | Google Gemini AI

- Shipped employee management, attendance, and leave workflows with Excel import/export and AI-assisted task generation, reducing manual admin work.

E-Commerce & Business Applications

Next.js | React | TypeScript | Supabase | Tailwind CSS

- Delivered e-commerce and booking platforms across jewelry, travel, and restaurant clients, covering catalog, cart, checkout, and payment integration.
